Top 5 questions you may ask about ORCID:

Have an ORCID iD? Don't have an ORCID iD? Not sure what to do about your ORCID iD? Here are some answers to the top 5 frequently asked questions on ORCID:

**Q1.** I don't have an ORCID iD. How to register one?
Register for a new ORCID account via PolyU Library by following the steps [here](#). Through this process, you will also authorize the Library to update your publication records in future.

If you already have an ORCID iD and wish to link it to PolyU, follow the steps [here](#).

**Q2.** I have an ORCID iD but it does not have any publication information. What should I do?
We suggest that you start adding works from Scopus. Follow the steps here to **Add Works from Scopus to ORCID**.

Tip: You may directly search with your Scopus Author ID (if you have your ID in hand) to retrieve all your publications in Scopus, confirm they are all your publications, and then click Add to ORCID to send them to ORCID. After completing this process, your ORCID will be integrated with Scopus. Your Scopus Author ID will also be shown in your ORCID profile. [Contact us](#) if you need help from a librarian.

ORCID also allows you to add publications from other platforms. You can consider these platforms after adding works from Scopus.

**Q3.** I have an ORCID iD, enriched with publications but not from Scopus. Do I need to integrate with Scopus?
We still suggest you to **integrate your ORCID with Scopus**. Integrating ORCID with Scopus allows quick access from one platform to another, which helps you further increase your research visibility.

**Q4.** I have an ORCID iD, enriched with publications from Scopus, but it's not complete. What should I do?
First, check if you have publications associated with another Scopus Author ID. If yes, request Scopus to merge your Scopus IDs first and then “Add to ORCID” again from your main Scopus ID. Visit here to know how to [request author detail corrections](#) in Scopus. [Contact us](#) if you need help from a librarian.

If you have publications not covered in Scopus, you may also add works manually in ORCID. Visit here to learn how to [add works manually](#).

**Q5.** Why authorize Library to update my ORCID? How?
Granting authorization to the Library for managing ORCID records will enable automating the population process with records from PolyU Institutional Research Archive. This ensures that your ORCID profile is enriched from multiple sources, in addition to Scopus, with minimal effort. To authorize the Library with your existing ORCID, click [here](#).
